RFID MONTHLY UNLIMITED CAR WASH SYSTEM

Special points of interest:

- Creates a Steady Stream of Reoccurring Monthly Revenue
- For Tunnels, In-Bay Automatics, Self-Service Bays & Vacuums
- Works on Anyone's Wash Equipment or POS System
- Automatically Bills Your Customer's Credit Card Monthly and Deposits Into Your Bank Account
- System Works with Multiple Car Wash Locations
- Site Owner can Choose ANY Credit Card Processor

Makes Unlimited Washing Simple

With an unlimited wash program, customers are offered unlimited washes at a set price for a 30-day period. At the end of the 30-day period, the customer's credit card on file is automatically billed for the next 30-day period.

Once a customer has signed up for one of the wash packages in the unlimited program, the customer will simply drive up to the designated wash bay and the wash will automatically activate. The system knows which wash package to enable by reading the customer's windshield tag.

The Clean Car Pass Monthly Unlimited Car Wash System utilizes the latest in RFID (Radio Frequency Identification) technology.

CLEAN CAR PASS
RFID READER

Signing up customers is simple. The system comes with a wireless hand held scanner and printer which can sit stationary in a store or can be carried around the car wash lot by an employee. Customized brochures (provided with the system) can be handed to the customer to aid in wash package selection. The hand held scanner has a built-in card reader and signature pad so the customer can even sign up in a wash bay. The hand held's printer also prints

WIRELESS HAND
HELD SCANNER WITH
CREDIT CARD
READER

out the customer's contract so there is **no** hassle for the customer.
